Art Unit: 1714

The specification is objected. Again, the recited "Curve 5(a)", "Curve 5(b)" and "Curve 5(c)" in lines 1, 2 and 4 of page 8 is objected and "Figure 5(a)", "Figure 5(b)" and "Figure 5(c)" recited for drawings are suggested.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-7, 9-11, 14-16, 20, 22-25 and 40-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

This is NEW Matter rejection since newly recited "conjugated diene" has no support in the originally filed specification and applicant failed to show otherwise. Elastomers and rubbers have conjugated dienes.

Claims 1, 3-7, 9-11, 14-16, 20, 22-25 and 40-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 1714

Applicant failed to show how to achieve a polymer having amorphous and crystalline region from a conjugated diene forming an elastomer and a rubber. The specification does not show the instantly claimed method.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 5, 9, 10, 11, 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited polymers in claims 5 and 9 are not conjugated dienes and thus they lacks an antecedent basis.

Improper Markush language is recited in claims 4 and 10, and an insertion of "and" before "Polysilanes" in last line is needed.

Conjugated diene of claims 11, 23 and 24 cannot be polyaniline, and thus claims are indefinite.

Note that the rejections based on the prior art are withdrawn since they do not teach the instantly claimed conjugated diene polymers.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
